VINCENT ONCHIEKU COLLINS

Cloud & Data Analyst | Business Analyst | Cybersecurity

- Nairobi, Kenya • vincentcollins690@gmail.com • +254 758 550468 •LinkedIn • Github •Website

PROFESSIONAL SUMMARY

I work at the intersection of data, cloud infrastructure, and business analysis, helping organizations turn technical complexity into clear, measurable outcomes. At the Kenya Revenue Authority, I have led cross-departmental process improvements and built data workflows that cut errors and saved time. My background spans Python automation, multi-cloud deployments, and cybersecurity, and I hold certifications across AWS, Azure, and ethical hacking.

SKILLS

- **Cloud & DevOps:** AWS (EC2, S3, Load Balancers), GCP, Azure, Docker, CI/CD, Firebase, Render, Gunicorn
- **Programming & Backend:** Python, Django, Django REST Framework, Node.js, JavaScript, Bash, SQL, PostgreSQL, HTML/CSS
- **Cybersecurity:** Penetration Testing, Vulnerability Assessment, Metasploit, Nmap, Wireshark, Burp Suite, Nessus, OWASP ZAP, Kali Linux, JWT, Entra ID
- **Data & Automation:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Power BI, n8n, Jupyter Notebook, Make
- **Frameworks & Tools:** React, Express.js, MERN Stack, Git, GitHub, Swagger UI
- **Soft Skills:** Stakeholder Communication, Requirements Documentation, Process Optimization, Cross-Team Collaboration, User Training, Technical Writing, Problem-Solving

WORK EXPERIENCE

Business Analyst **May 2025 - Present**
Kenya Revenue Authority (KRA) **Nairobi, Kenya**

- Translated requirements from 5+ departments into technical specifications, reducing requirement conflicts by 30%.
- Identified 15+ process optimization areas through workflow mapping, cutting manual data entry by 10%.
- Designed Power BI and Excel dashboards to track KPIs for executive reporting.
- Facilitated UAT for 3 systems, resolved 50+ issues and trained 100+ users across technical and non-technical teams.

Data Analyst **September 2024 - December 2024**
Garnet Finance **Nairobi, Kenya**

- Automated data analytics pipelines using Python and Bash, saving 10+ hours of manual work weekly.
- Cut operational errors by 25% and improved team productivity by 15% through workflow redesign.
- Detected and remediated 5 security vulnerabilities across financial data systems.

Information Technology Intern **May 2023 - August 2023**
Nakuru Law Courts **Nakuru, Kenya**

- Resolved 100+ technical support tickets with a 90% user satisfaction rate.
- Improved system protection by 25% through patch management and daily IT operations.
- Managed user accounts, IT assets, and hybrid virtual/on-site court session setups.

EDUCATION & CERTIFICATIONS

ALX Google Cloud Program | ALX Africa (Oct 2025 – Nov 2025)

N8N Workflow Automation | Nairobi AI N8N Community (Oct 2025 – Dec 2025)

Ethical Hacking | Cyber Shujaa (Sep 2025 – Dec 2025)

ALX Back-End ProDev (Python & Django) | ALX Africa (June 2025 – Oct 2025)

Azure Security Engineer Associate (AZ-500) | Cyber Shujaa (June 2025 – Aug 2025)

ALX Professional Foundations | ALX Africa (Mar 2025 – June 2025)

Microsoft Security, Compliance, and Identity (SC-900) | Cyber Shujaa (May 2025)

Cloud Practitioner (AWS re/Start) | AWS re/Start (May 2024 – Aug 2024)

Bachelors' Degree in Business Information Technology **Sept 2019 - Dec 2024**

Kabarak University **Nakuru, Kenya**

- **Relevant Coursework:** Data Communication, Network & Communication Technology, Operating Systems, Web Application Programming, Java, Data Mining, Object Oriented Programming, Database Management System

PROJECTS

SentinelIQ – Fintech Security Monitoring Platform

- Architected a security-first backend platform using FastAPI and PostgreSQL, implementing real-time user access control, centralized audit logging, and anomaly detection.
- Built a Zero Trust infrastructure model with IAM and secrets management, integrating security scanning and Policy-as-Code into CI/CD pipelines for automated compliance.
- Deployed Grafana and Prometheus dashboards to visualize security metrics and automate Linux system hardening for incident response.

Azure & Microsoft Security Labs (AZ-500 & SC-900)

- Configured Microsoft Entra ID, conditional access policies, and privileged identity management. Implemented secure Azure infrastructure with ARM templates, Defender for Cloud, and Sentinel for threat detection and compliance monitoring.
